of the side airbag

The CLIX Airbag System
is computer-controlled
and produced

Suitable for more than
90% of all cars

WALSER CLIX-Airbag

Every seat cover with the patented WALSER CLIX-Airbag system is saved with an individualised code and ensures all-over quality assurance from production to the consumer, which can save lives in an emergency.

WALSER materials

Velours material

Velours is the name for a textile material with a particularly fluffy surface structure. This material is particularly suitable for designs with a classy material look.

Mesh material

Mesh is an air-permeable textile fabric. Due to the net structure, the fabric does not lie completely on the body and thus ensures additional air circulation. Due to its dynamic surface structure, the use of mesh is particularly popular for sporty seat covers.

Jersey material

Jersey is a stretchy, knitted material that lends itself to seat covers due to many of its qualities and is suitable for long-lasting seat covers particularly due to its crease-proof properties.

Artificial leather material

Artificial leather is characterised by its classy look. The material is particularly soft to hold and is made of polyurethane. Artificial leather offers the additional advantage that it is very easy to clean.

Taffeta material

Taffeta is a polyester material characterised by water-repelling and robust fabrication that therefore offers outstanding protection for car seats. In addition, it can be cleaned easily and quickly.

Jacquard material

The jacquard web technology enables an endless amount of patterns to be produced that are particularly suitable for decorative materials of seat covers. The advantage of a jacquard pattern compared to a print is the positively unshakable durability of the design.

Embossed material

Embossed material is produced in the heat stamp process. The advantage of this material is its delicate structure, which gives every car a particularly high-quality and at the same time classy atmosphere.

Real leather

Seat covers made of real leather are of extremely high quality, are resistant and impress with their luxurious look. A leather seat cover is produced from nappa leather, is breathable and is also very easy to clean.

WALSER Zipp-It

The simplest installation thanks to the zip system

Where to find the Zipp-It system	BASIC	BASIC ZIPP-IT	PREMIUM	PREMIUM ZIPP-IT	DELUXE ZIPP-IT
1 Side lever system front seat backrest cover		✓		✓	✓
2 Headrests front seat cover		✓		✓	✓
3 Separable rear seat backrest cover	✓	✓	✓	✓	✓
4 Side lever system front seat surface upholstery					✓
5 Assembly system front seat backrest cover					✓
6 Headrests rear seat cover					✓
7 Separable rear seat surface upholstery					✓

1+4 Side lever systems Front seat covers

Thanks to the Zipp-It side lever system, the side parts of the car seat cover no longer need to be cut into with scissors.

In addition, the Deluxe Zipp-It has a Zipp-It side lever system on the seat surface.

2+6 Headrests front seat and rear seat cover

For the headrests, too, cutting into the car seat cover is a thing of the past thanks to the Zipp-It system. Here, the zips are simply closed up to the headrest guides.

3 Separable rear seat backrest cover

All WALSER seat covers have separable rear seat backrests as standard. With this solution, the rear seat backrests can be folded down as usual without the cover needing to be removed.

5 Assembly system Front seat backrest cover

Deluxe Zipp-It car seat covers have the practical zip assembly system for the front seats, with which pulling the car seat covers over the original seats is child's play.

7 Separable rear seat surface upholstery

In addition to the standard separable rear seat backrest covers, the Deluxe Zipp-It car seat covers from WALSER also offer rear seat surface upholsteries that can be separated into 3 parts. These make it possible to fold down the rear seat surfaces as required, just like the backrests.

BASIC

In the Basic programme of WALSER seat covers, you will find items in beautiful designs that stand out particularly due to their outstanding price/performance relationship.

All Basic seat covers have been tested and approved by the TÜV Rheinland Group with regard to side airbag suitability. They are suitable for use on standard normal front seats for drivers, front passengers and rear seats.

BASIC: Car seat cover Hastings

High-quality seat cover with a trendy look

The seat cover Hastings is the highlight of the WALSER Basic programme for seat covers. This seat cover gleams with design elements of contrasting colour and constitutes the top seller in the Basic category in the combination with the WALSER CLIX-Airbag system.

<i>Item no.</i>	<i>Colour</i>	<i>Unit</i>

DELUXE

With the Deluxe collection, the name says it all. The highest-quality fabrication combined with luxurious materials helps provide each interior with a classy atmosphere. With clever and handy details, such as front seat map pockets, as well as the standard full equipment of the patented Zipp-It technology from WALSER, these seat covers ensure luxurious comfort.

The front seats of the Deluxe series are equipped with a quick-action locking system that makes installing them easy, without the need for additional material or tools or cutting into the seat cover.

All Deluxe seat covers have been tested and approved by the TÜV Rheinland Group with regard to side airbag suitability. They are suitable for use on standard normal front seats for drivers, front passengers and rear seats.

DELUXE: Car seat cover York

Simple elegance meets luxurious fabrication

The car seat cover York impresses with its classy design with colour-contrasting edging. The high-quality artificial leather was elaborately fabricated and provided with high-quality lamination. Lambskin car seat cover 41

Lambskin steering-wheel cover 41

Lambskin

Temperature-regulating, soothing and completely natural. Added to this are the simple maintenance and the dirt and bacteria-repelling properties, making lambskin one of our favourite products.

From spring to winter

Probably the biggest advantage of lambskin is that it is made of a fibre that keeps one warm and dry in the winter and cools one down in the summer. Lambskin has a natural air cushion. A „basic warmth“ thus forms and the air can circulate.

Lambskin has the ability to absorb up to a third of one's own weight in dampness without feeling damp in the process. In addition, lambskin has outstanding climatizing properties.

Lambskin protects from the cold and regulates when it is hot.

Cools down in summer - warms up in winter

Breathable and dampness-absorbing

Cuddly soft sitting comfort

100% natural

Lambskins are exclusively natural products and are therefore particularly suitable for sensitive skin. They are breathable, odourless, antistatic, heat-insulating and flame-retardant in accordance with Directive 95/28/EC Annex IV. Moreover, they are completely free from heavy metals or similar toxic matter.

Dirt and bacteria-repelling

By nature, lambskin has high self-cleaning power and has a bacteria-repelling effect. Natural lambskins are extremely durable and long-lasting!

Lambskin car seat cover

Real lambskin – hygienic and breathable

With the beautiful Lambskin car seat cover, you can really enjoy your car journey. Due to its relaxing and circulation-promoting effect, the real lambskin ensures your wellbeing during the journey. The cuddly seat cover beautifies your car interior and protects your padding from wear as well as soiling.

- Wool thickness: 16 - 18 mm
- Size: universal

Lambskin steering-wheel cover

Steering-wheel cover with many advantages

Would you like to enhance the visual appearance of your vehicle and are therefore on the lookout for a decorative accessory? Then the Lambskin steering-wheel cover is exactly the right choice for you. It convinces not only with its attractive look, which makes the steering wheel a real eye-catcher in your passenger compartment, but also offers you a comfortable and - most importantly - secure grip at all times while driving. This increases not only your fun in driving, but also your safety and that of your passengers.

WALSER

WALSER Tailor Made - not just a brand!

Company vehicles are often exposed to particularly heavy demands. For this reason, it is important that transporter seat covers be produced from high-quality material. Therefore, the Walsers Transporter Collection offers a choice between jacquard material and artificial leather. These are characterised by colour and light-fastness - artificial leather is also waterproof. In addition, a strong argument for Transporter seat covers is the tailored seat cover. Due to the high demands, the tailored cut will be used particularly with vehicles that are used daily and do not want to do without the comfort of a tailored seat cover anymore.

Transporter tailor made seat covers Jacquard material

Perfect fit

An ideal fit for your car, van, commercial vehicle

Durable materials

The jacquard material is extremely hard-wearing

Robust quality

Fulfills the highest standards

Transporter tailor made seat covers jacquard material

The Transporter seat covers are adapted to the individual vehicle types through precisely tailored cuts. Due to the precisely fitting shape, they seem like an original seat cover and protect this at the same time. The jacquard material is extremely robust and thus fulfils the highest standards.

Velours material

Velours is the name for a textile material with a particularly fluffy surface structure. This material is particularly suitable for designs with a classy material look.

Mesh material

Mesh material has indentations and thus does not rest completely on the body. The material thus has better ventilation, ensuring a more comfortable journey.

Jersey polyester material

Jersey polyester material is universally in use and can thus be used for flexible designs. It is characterised by high formability.

Artificial leather material

Artificial leather seat cushions not only allow a more comfortable sitting experience, but also save you elaborate cleaning. These seat cushions are produced from particularly resistant materials. Thus at the same time they are colour-resistant, non-fading and can be wiped clean easily with a damp cloth.

16094 black/grey

Before the first use, we recommend you soak your Chamois leather cloth in warm water, rinse it well and then wring it out. The leather thus becomes softer and more slip-proof. With the Chamois leather cloth, you dry your vehicle fully streak and fuzz-free. You can also use the cloth to clean the interior and the glass surfaces.

Chamois cloth

Easy use – also suitable for glass surfaces

With the Chamois synthetic cloth, you have the perfect aid for cleaning your vehicle in a professional manner. The soft cloth removes water drops perfectly and residue-free from paint and windows, including in the household. After you have been in the car wash with your car, carefully wipe it with the Chamois leather cloth. You thus prevent water spots and the paint shines like new.

- Material: PVA
